Mock Exam Course for Non-EEA Qualified Optometrists

Are you focusing on a CLEARVIEW to a CLEAR PASS?

The right information from the right people at the right time.

CLEARVIEW Training is a leading independent training course provider for optometrists in the UK, providing practical based educational programmes for both trainees and qualified practitioners.

Our intensive course for non EEA qualified Optometrists focuses directly on the College of Optometrist's exam syllabus. Held over four days at the City University's Fight for Sight Optometry Clinic in London, our course will give delegates an opportunity to experience a selection of the College's practical exams held in real-time and under exam conditions. All course tutors are current College of Optometrists Examiners and delegates are provided with immediate feedback with individual onward learning objectives – it doesn't get any closer to the real thing than this!

Additional lectures and interactive seminars place emphasis on exam format, exam techniques and pass/fail criteria and will provide delegates with the knowledge and understanding of UK based optometric practice.

Day One:

Lectures will include: the Ocular Disease & Abnormality exam, the Binocular Vision exam, the Contact Lens exam, the Dispensing exam and the Routine exam.

Day Two:

Mock exams will be taken in both Routine and Contact Lenses. Delegates are provided with immediate feedback with individual onward learning objectives. Practical based feedback tutorial sessions immediately follow in small groups of 4-6.

Day Three:

Mock exams sessions will be taken in the Binocular Vision practical, the Dispensing station and the Ocular Disease & Abnormality station. Practical based feedback sessions will follow with a focus on techniques and pass/fail criteria.

Day Four:

The final day shall consist of a selection of lectures and interactive seminars. Subject covered include: Drugs, the Management of Partial Sight, and UK Law & Practice. Breakout sessions in smaller groups will consist of interactive sessions covering a selection of pre-prepared case scenarios.

Note: It is expected that all delegates will have registered their interest in taking the examination of Non-EEA Qualified Optometrists with both the General Optical Council (www.optical.org) and the College of Optometrists (www.college-optometrists.org) before attending this course.
